

To the Working Group on Gun Violence Prevention:

As a teacher and father of three young children, I was greatly moved by the killing of teachers and children at Newtown. I strongly believe there are too many guns in our society and that stronger laws should be enacted to limit access to guns.

Please:

ban assault weapons and high capacity magazines require universal background checks require gun manufacturers to pay into a fund to help prevent gun violence, much as tobacco companies are required.

Thank you,
