Kevin,

Today our country and the State Of Connecticut are being exploited by left wing gun grabbers that have no regard for Constitutional rights. The left wing gun grabbers are operating under the pretense of recent tragedies for their own political agenda, not the majority they represent.

In Connecticut we have dozens of Legislative House and Senate candidates that proudly took a public stance on gun rights for their own self-interest. It is imperative the Republican Legislative Members do not stonewall gun owners who supported their elective promises. Unfortunately, sometimes folks assume that just because a politician is a Republican, they are a solid supporter of the Second Amendment. As you are aware, some Republicans only give lip service to the Second Amendment. They tell you what you want to hear in an election year and then vote against your rights once safely in office.

Being one of the many who actively supported your election as our 8th District Senate Representative we are looking for your solid leadership to support our rights given to us under the Second Amendment by having the Republican Legislative Membership defend their constituents Second Amendment Constitutional rights and Connecticut's Castle Doctrine for self-defense.

We strongly disagree with any gun law legislation that includes; gun registration, magazine round capacity limitations, non-automatic assault weapons, shotguns, hunting weapons, etc. Please communicate to your legislative associates that ignoring gun owners and the issues they care about is unacceptable and will play a major role in the next state election.

Our warmest regards,

Ed and Joann Tibbets
