

I am fully in favor of strong, comprehensive gun registration and limitations.

I support- :

1 Closing all loopholes and requiring registration of all guns. I do not think already owned guns should be excluded or grandfathered, but that they should be required to be registered as well. I also believe there should be regular, periodic proof of retention of those weapons or sale thereof.

2 A complete ban on all semi-automatic and automatic weaponry- including hand guns, rifles, etc.

3 A ban on removable gun clips of all size.

4 Background checks for all registrants to insure against violent offenders, mentally challenged purchasers, etc.

5 Age restrictions on the purchase/registration of all guns. I am open to discussion as to whether a 16 year old who is considered old enough to drive a car is of an age and responsibility to register a gun, or 18 years old when old enough to vote or enlist in the military.

6 Requirements for safety and control of registered weapons in a home or business so those not registered to handle those weapons can not get their hands on them.

Thank you for your thoughtful consideration.
