

This is a civil rights issue about public safety. Gun owners get to keep their guns. This is about restricting certain weapons and ammunition to minimize massacres from occurring in malls, movie theaters, schools and else where in the general public. We can choose to do nothing and continue to watch children and adults get slaughtered, or we can choose to demand change to lower the number of incidents.

This is the most important issue of our times. Immigration, the economy, jobs, same sex marriage, 2nd amendment rights, women's rights- none of that matters if you're killed by an assault weapon.
