

Our children's safety should be our number one concern of course. Passing laws to take guns away from the thousands of law abiding Connecticut citizens is not the answer. Taxing just us to find revenue to help find sole answers is not fair either. There are 315 million people in our country now. There are bound to be mentally unstable people out there that are capable of these horrific acts that we've seen in the past few years. If you don't want armed guards in the schools, at least give our teachers taser guns. One last thing. Terry Nichols and Timothy McVay used fertilizer and diesel fuel to tragically kill 168 people, including 18 children. You didn't limit the amount of diesel fuel or fertilizer we could buy, or put an exorbitant tax on it. Thank you.
