According to Neighborhoodscout.com who compiles their information from the FBI database and 17,000 law enforcement agencies across the United States, using the data they provide I have compiled some very interesting and frankly eye opening information. I have chosen 8 States from which I have drawn my information from, 4 States with the STRICTEST gun laws including a already existing assault weapon ban are New York, New Jersey, Connecticut, Massachusetts and 4 States with the very least or none "Constitutional Carry States" which are Alaska, Vermont, Arizona, Wyoming. The data is strictly violent crime data, (violent crime is defined as Murder, Rape, Robbery and Assault)

I will start with the STRICTEST gun law States.

The chances of being a violent crime victim in:

New York is 1 in 251

New Jersey is 1 in 324

Connecticut is 1 in 367

Massachusetts is 1 in 233

The Chances of being a violent crime victim on average in these States are 1 in 293

Constitutional Carry States.

The chances of being a violent crime victim in:

Alaska is 1 in 165

Vermont is 1 in 740

Arizona is 1 in 246

Wyoming is 1 in 456

The chances on being a violent crime victim on average in these States are 1 in 401

The National Median of violent is crime is 3.9

The STRICTEST gun law States.

New York is 3.98

New Jersey is 3.08

Connecticut is 2.73

Massachusetts is 4.28

The average in these states are 3.51

The Constitutional Carry States.

Alaska is 6.06

Vermont is 1.35

Arizona is 4.06

Wyoming is 2.19

The average in these states are 3.41

From looking at this information every one has a greater chance of being a violent crime victim in the states where gun laws are the STRICTEST versus states with the very LEAST. I ask you how

is this possible if the gun is the culprit? I propose to you it is in-fact the HUMAN who is the culprit and not the gun!

I have chosen these States for you to realize additional Gun Law is not the answer, Gun Control is not the issue.

New Gun Control Law's are unproductive and does not solve the problem I oppose any and all new proposals

Re-instatement of a FAILED Gun Ban is unproductive and does not solve the problem.

The simple fact is that the HUMAN who wishes to do bodily harm will do so regardless of the Law, this is a proven fact.

I am NOT in support of any proposed legislation that does not directly impact the issue

I am NOT in support of any further firearm restrictions to law abiding citizens

I am NOT in favor of providing a path of least resistance for the Criminal.

I am in favor of bullet proofing our schools

I am in favor of eliminating Gun Free Zones

I am in favor of allowing teachers the option of defending our children and themselves.

I am in favor in paying higher taxes to have full time ARMED Police Officers at every Gun Free Zone.

I am in favor of RESTRICTING the criminal and NOT the law abiding citizen.

I say to you if in fact public safety is the agenda and saving lives is a priority then let us face the truth let us face reality that in fact it is the HUMAN that defies the law and Not the object with this knowledge we must act accordingly, I say to you let us NOT be swayed by personal and political agendas, I say to you let us NOT dismiss reality, the truth and fact!

I look forward to hearing your thoughts

Sincerely

Harold Douglas
