

To Task Force Members,

Please consider me another advocate for stricter limits on gun ownership. Please base your decisions on accurate information such as the prevalence of gun injuries and deaths to women and children when there is a gun in the home, compared to when there is not a gun in the home (NYTimes today, Feb 3, 2013).

Along with the League of Women Voters I support the following:

- universal background checks
- a ban on high capacity ammunition magazines greater than 7 rounds
- a better assault weapons ban
- updated requirements for safe storage of firearms
- consideration of a permit for long guns

Thankyou for working on this. Please use common sense and support the issues listed above.
