

Please let's all rally Ct. And make our movement toward ridding our towns of assault weapons a model for the nation as quickly as possible.

Governor Cuomo and his bipartisan government have started. let's be next. Pass laws against assault weapons to begin the movement toward sanity. Getting these guns under scrutiny may not give immediate results but in time just taking a stand against their availability will turn the tide and give us the breathing room to even out communities.

With these laws come involvement from our Ct. community and the satisfaction we are moving away from a misstep in our society that has come to a head this year. This is governments job, to help we citizens with our checks and BALANCES. We are an out of balance society right now.

Thank you.
