To Whom it May Concern,

I am a hard working, law abiding citizen and just recently became a gun owner as a way to protect myself. I believe that many bills recently introduced in the Connecticut legislature are misguided and would only hurt gun owners who are responsible, law abiding citizens. I do not believe my right to defend myself should be infringed upon by the actions of a deranged gunman in Newtown. Limiting the number of rounds in a handgun only decreases my odds of successfully protecting myself. I would strongly encourage members of the gun violence task force to strengthen existing background checks, keeping guns out of the hands of criminals and focus on improving mental health care.

Thank you for your time,

Jennifer Wieloch
