

Our state already has some of the most restrictive gun laws on the books. Limiting magazine size simply won't solve the problem, as changing a magazine takes less than two seconds. All that would be required for a person dedicated to hurting others would be to carry more magazines. This is a matter of controlling who can have guns. So I hope your emphasis is placed squarely on mental health instead of curtailing the Constitutional rights of your citizens.

In short, I absolutely oppose any further restrictions on law abiding gun owners in Connecticut. Please enforce existing laws before adding new ones.

Thanks!
