

Hello,

I am writing today to urge you to please oppose any proposed legislation that is introduced that has NOT had a full public hearing. The committee was put into place to research and gather as much information from individuals from all sides. Most importantly from individuals who are educated in every topic including, MENTAL HEALTH, Firearms safety, Firearms Manufacturers, Law Enforcement and Education Departments. Politicians, the citizens of Connecticut and the nation have said that there is no quick fix. The Governor has made it clear that he is annoyed that things aren't moving at a faster pace. These decisions can't be made because of one person. Let the Committee do its job and provide recommendations. Emergency Certification is not in the best interested of the State of Connecticut. The People of Connecticut vote to place politicians in to positions. We live in a Country that is built on Democracy, not under Dictators. We as TAX paying citizens have the right to be heard at a Full Public hearing of all these issues.

I urge you to please have a Full public hearing on any legislation that results from recommendations from each task force working group.

Thanks
Joe LaChioma
