

I would ask that any legislation that you would recommend, would be brought before Full Public Hearing. We the people should be able to speak on the proposed legislation before it is voted on by the politicians. If we are to have a government of representation, than we would ask that you would hear us in the proper forum (of a full public hearing). We the people want to be properly heard; in the manner that is set forth (public hearings at the Capital). Please do not pass laws without properly hearing from the public. We need to hear your proposals, and you need to hear our response. You represent us, and we need to be heard by you, before you pass any laws (without us being heard).

Sincerely,

John Gori
