Please do not use the deaths of these 20 innocent children for political agendas as sad as it may be and however quickly you may think you have to act.

As a marine corps veteran who has fought for our constitution under oath once before am now

fighting for it again against our own government. I can not stand united with any American who would volunteer to forfeit their rights that so many have sacrificed for including their lives. Our forefathers who wrote the constitution did not decipher between hunting, target shooting, or up to including self defense.

A black and ugly rifle is NOT an assault rifle. Do not be fooled merely by cosmetics. Ten or thirty rounds does not matter in any unlawful shooting. Criminals will be criminals, laws do not pertain to them. This is getting very old, honest and law abiding citizens are the least of our worries.

If you must do something meaningful. Go after the major drug problems we have in this country (i think every American will stand with you on that one). Unconstitutional laws are not laws, it does not matter who writes them.

I am a citizen. I pay my taxes and I vote.

Thank you for your time and consideration on this very, very important issue to myself and many Connecticut residents
