

Good Evening:

The issue isn't High capacity magazines, or Military style semi autos.

The issue in Aurora Colorado and Newtown Connecticut was a mentally unstable individual having access to firearms.

How did they get these legal firearms?

That is what needs to be worked on.

Banning High Capacity Magazines or Military style semi autos will not stop the violence.

Columbine occurred when the Brady law was in effect.

Illegal drugs Flood across our borders, despite Law enforcement's best efforts.

Banning firearms only applies to law-abiding citizens, such as myself.

Criminals will not be turning in their firearms, and I fear law-abiding citizens would be made Criminals by a gun ban.

Think of the financial loss if someone's \$1,000 plus firearm is confiscated?

I doubt there would be a compensation program for Military style semi autos turned in.

Also, take down the "No weapons allowed" signs at schools.

We guard Financial Institutions, Airports, and other important buildings with armed security.

Why not schools?

Undercover firearms, be they in administration, custodial/maintenance, or teachers could be a quick response force.

I'd prefer help to be 10 seconds away, not 10 minutes.

In closing, Law abiding citizens are not the issue.

The anti-gun groups are using the recent tragedies to forward their causes.

Are the Obama daughters, Nancy Pelosi, or Michael Bloomberg more important than any one else?

Why are they guarded with High capacity and/or Military style firearms, but most Americans would be denied that ability?

Cain killed Abel with a rock.

Let's focus on helping the Mentally impaired not hurt themselves or others.

Regards,

John M. Serdy
