

Dear Board,

As you know in history gun regulating and confiscation has been tried many times. All with devastating results to the countries. This is America land of the free. Do you really think criminals would abide by any regulations for their illegal guns. The American Public countless times have saved people with their weapons. Most often with out shooting. If you want my support ever again for your vote to office, oppose these unconstitutional proposals. Remember you to are an American also.

sincerely , John Wicklund Berlin,CT. 06037
