

Hello

I just heard on TV about a proposal to have semi auto rifles destroyed. I cannot believe that. I have some high end rifles that cost me thousands of dollars and the seven round per mag will make many of my hand guns essentially banned. This is not a way to treat a law abiding life long tax paying resident of Connecticut. I will sue this state and I know I will win. These items you talk about destroying are private property and if this foolish law passes I will expect being reimbursed.
