CT Gun Violence Task Force

Dear Members of the Gun Violence Task Force:

I am strongly against any further gun laws in our state. We have enough. Banning semi automatic rifles is an attack on our second amendment rights. Banning standard 30 round magazines is also an attack on our rights.

The second amendment was created to defend against tyranny. It had nothing to do with sport or recreation. The second amendment is just as relevant today as it was when it was written.

I consider the Constitution to be a sacred document.

My Grandfather, his father and all their male members of the family were all executed by Stalin's henchmen AFTER they surrendered their weapons.

I wish my grandfather held onto his rifle and defended himself. My father was only spared because he was an infant. My father escaped communism when he was 16. He was given a choice. Either you join us or we kill you. He fled.

Tyranny is inevitable. Freedom must be preserved and defended. We must be ever vigilant against those who seek to destroy our rights.

We the people are the militia. We have a right to own a semiautomatic rifle, 30 round magazines and ammunition. The ar 15 is not even close to the m4 that our military uses.

Criminals will not follow any of the laws that are passed. A huge illegal black market will fill the void left by banning semi automatic weapons. Its simple economics. Please do not penalize honest good residents for the demonic actions of a sick individual.

Adam Lanza should of never had access to those weapons. This is a storage issue and a mental health issue.

I consider what happened in New York to be a vicious assault on our rights. They turned 1 million honest folk into criminals with a bill that was snuck through in the middle of the night.

Your oath is to the Constitution.

With Respect,

Joseph A Kustra
