

Hello there,

I am a nurse, a mother, a wife, a teacher and I have taught children to resolve conflicts peacefully and have spent my life caring lovingly and compassionately for ill individuals. I cannot stand by and see another child killed due to the sale and access to military style weapons and bullets. This needs to change.

Let's be intelligent citizens of America here, do not compromise the health of children we are taught to protect and educate. Let dangerous weapons as these be left in the hands of trained military, not with access by everyday citizens who do not need to own these weapons of mass destruction for hunting or rifle shooting.

What rights are we protecting by allowing this misinterpretation of the second ammendment to continue?

This is not the America I want to live in.

My favorite quote is: "The pen is mightier than the sword (read assault weapon)."
