

I am a mother of three and I am terrified. The type of weapon used to execute 26 people in Newtown should not be legal in civilian hands. Much is made of 2nd amendment rights, which, as we all know, are up for interpretation. However, what of my rights, and my children's rights to move about society, to go to school, with the expectation of safety? More guns is not the answer. I have no desire for my first grader's school to resemble a prison. Please think of the peace-loving mothers and citizens when you decide if killing machines should be legal.
