

I am writing to ask you not to support an assault weapons ban, magazine capacity limits and these so called universal background checks.

These proposed laws will not reduce violent crime or school shootings for very clear reasons. Criminals don't care about the law, that's what makes them criminals. The people who have committed these horrible mass shootings have all been somehow mentally compromised. Therefore it's clear to me that banning any type of fire arm, or accessory is little more than an emotional, knee-jerk reaction.

As far as background checks I support all retail checks on all arms. However mandatory background checks on private sales IS a gross infringement of my rights. The type of people willing to kill rape and steal do not care about where the guns they use come from, and with the drug trade as strong as it is they will ALWAYS have access to guns.
