HI, i just want to say that the best way to prevent gun violence, IS NOT to instate ridiculous gun bans. Gun bans solve NOTHING, however only make the situation WORSE. You cannot remove arms from law-abiding citizens to make things safer, you cannot register a gun if it is stolen and bought/sold on the black market. If criminals or mentally ill people want to commit a crime they will do it, anyone can walk down to the ghetto and pick up a gun for $20. So what would gun laws and restrictions solve? It wont help, all it would be doing is making innocent people targets...Look at sandy hook, the shooter went in there knowing nobody in the building would be armed or able to stop him. Sometimes, you can only fight fire, with fire. because the only thing that can stop a madman with a gun, is a good guy with a gun.

You cannot protect anyone with a "gun free zone" sign. Because when a criminal comes in with a gun, that wood table isnt going to protect you for 10-15 minutes, until the police, WITH GUNS get there to handle the situation.

As for "military style" weapons. a gun is a gun, they are all equally dangerous. so why does it make sense to ban one specific type of semi automatic gun, when there are tons, that are just as dangerous and still semi auto that you can legally buy. Banning a weapon because of its looks is just just downright blissfully ignorant.

Thank you for taking the time to read this email, it is important that our stance is heard on this issue.
