

I am writing about the Gun Violence subcommittee. Here is my testimony.

- As a mother I am concerned about the non common sense gun laws.
- I ask that they fit everyday citizens and not a small minority of people.
- I am appalled and saddened that we can't think about our neighbor, Newtown the same ever again.
- The idea that these overpowered guns are even legal and that someone can own so many of them really disturbs me.
- As a Marriage and family therapist I am also concerned at how owning these guns changes the owner and how they start to view the world around them. How they can feel more powerful than others and even better then others.

Thank you,

Lenore Pranzo, LMFT

Mother and concerned citizen in Redding, CT
