

Please say yes to gun violence prevention for the safety of our future generations.

I am a grandmother, mother and retired preschool teacher and never in my life thought there would be the need for a letter like this. Testimony to make sure our children and all families are safe in their own homes, neighborhoods and schools?! Isn't that a basic right in this country? Shouldn't we be ashamed that we are even discussing this?

I have no tolerance for guns, but that is personal. I agree that we can't change the 2nd amendment, but there is no reason for any citizen of the United States of America to own a military weapon or high capacity magazines. Killing people is actually against the law, so why would anyone need to spray someone with bullets?

We need a photo license to drive a car, why not to own and use a gun? People with bad driving records are tracked and taken off the road when they abuse driving privileges.

We spend a lot of time at DMV making sure we follow all the laws of owning and driving a car. Registration, current photos, driving tests, expiration of licenses....

Why not for guns? Keep it honest and safe. How could a gun owner protest that - just because we haven't had those laws before.

Change is good and its time for change in our gun laws. Its time we all come together on this issue for the sake of future generations of this great country of ours.

Shame on us if we don't.
