

Dear Legislators,

I plan to make every appearance possible to show my support of stricter gun laws in Connecticut. I was crushed and horrified by what happened in Newtown last month and made a vow that I would do everything I could do to make my voice heard. I have written letters, emails, will come to public hearings, make phone calls... PLEASE make this a new priority. Legislation should be driven by the interests of the people of our state, NOT the gun lobbies.

Please pass new legislation that keeps ALL military style weapons away from civilians. NO GRANDFATHERING. These are weapons of war, their sole purpose is to kill people and they have no place in peoples' homes. High capacity magazines, background checks, accountability, insurance, consequences for straw purchasers.... we all know what needs to be addressed.

The time has come to clean up this mess. The US is awash in guns, with little regulation. Please make Connecticut an example for other states and the nation.

Thank you.

Lucy Davies
