

Please consider the following for reasonable gun control legislation:

outlaw large ammo packs than can shoot more than 7 bullets before reloading.

provide funds for effective domestic violence training throughout CT judicial system.

provide funds training and oversight
for robust and effective process

to update and remove a name from the background check databases especially for a person on list in error ie.. has a very similar name to someone who should be on the list.

Put in place a way for me or any citizen to easily find out if I am on the state and federal background check lists.

provide funding training and oversight for robust privacy protections for all aspects of the databases for mental health background checks.

Thank you very much.
