

To all three working groups;

I urge you to hold full public hearings on all proposed legislation that may be as a result of your working groups. Governor Malloy originally fully backed your work and actually encouraged proper deliberations. Now due to pressure, mostly likely from Obama/Biden, our Governor has flipped on his instructions to your working group. It is now up to you to show how democracy works. Therefore I again urge you to have full public hearings on any legislation that results from your working groups.
