

Dear Committee,

I appreciate your hard work in this area. but I have one comment. I support the ban on assault weapons and over sized magazines, but I wish you would consider one fact. I have a 22 rim-fire caliber pistol that I use to enjoy inexpensive target shooting. Even with the factory magazines that fit completely within the grip, it holds more than 10 rounds. The 22 caliber is a very small bullet. I wish you would exclude "rim-fire" cartridges from the 10 round limit, thanks.
