

Good morning,

It is imperative that we make Connecticut a safer place to live in.

We must support our law enforcement officers with all of the tools they need to keep illegal guns off the street.

We must ban assault weapons. This should not be simply a list of guns but also a way to ban guns that any reasonable person would consider an assault weapon.

We must ban clips of more than five rounds.

We must provide more mental health tools.

We must provide resources to reduce gun violence in our cities.

Please do not wait until you have a perfect bill. It is too late for the children of Newtown, it is too late for the more than 1000 people killed by guns in this country since Newtown.

Sincerely,

Martha S. Brooks
