

I am writing in support today of the legislative initiative sponsored by CT Against Gun Violence.

There is no legitimate monetary or job related argument from the gun industry that justifies the failure to take action to protect the citizens of Connecticut. Like Governor Malloy who viewed the body of Noah Pozner, each member of the legislature should be required to view pictures of the bodies of those Newtown 1st graders destroyed by an automatic weapon and thereafter justify to us citizens any vote against an assault rifle ban and ban of large capacity ammunition magazines.

Thank you for your kind consideration of my views.

Meg Hochman
