

I am an EMT and know too well what happens when family arguments start, get out of control, and a shooting happens. This would not be the story if there were no guns in the house. There might be fights, even knifings, but those don't usually kill. Guns usually kill. And sometimes the ones killed are the children. And sometimes it is the children who use the guns, even accidentally. The result is the same. Guns usually kill.

Please help save lives. It is our responsibility as human beings to do this.
