

Hello

I would like to ask that you do not support any of the proposed gun legislation. It has become very apparent, very quickly that the safety of our schools and children are not the focus after the Sandy Hook tragedy. The improvement of the mental health system isn't even the focus. The anti gun activist are using this as a spring board to push their uninformed beliefs. Please prevent the uninformed from making decisions on the second amendment. If this was about protecting our children or curbing gun violence the effort should be placed on improved school security, enforcing current laws, and helping those that have mental problems. To make law abiding citizens have to buy insurance for their guns, pay a premium on ammunition, and limit their freedom of choice in the selection of guns they want to collect is unfair. We cannot own true military weapons. We cannot own full automatic weapons, those are military. What we can own are semi automatic guns that are fun for collecting and target practice. Its a hobby that brings families together to learn and share, why further corrupt families? The proposed gun legislation is emotional and does not address the real issue with guns...criminals they are our biggest problem. Please do not vote for any further changes to our second amendment rights!

Thank you,

Michael N Ross
