

Dear legislators,

Please make serious consideration for implementing stricter gun laws in Connecticut. I agree that programs to address mental health are also important, but we need to first put a stop to the rampant availability of guns and ammunition in our country! Anyone who is angry can act out and try to hurt others, but without a gun in their hands, they cannot do nearly as much damage. It is vitally important to make laws to make it harder to get those guns, as well as send the message to the public that we don't value a gun owner's right to bear arms over the human right to life.

Thank you for your consideration.

Miki Lasher, Ph.D.
