

As a mother of three young children, one of which is the same age as those tragically lost on 12/14, I beg that something be done to prevent this from happening again.

While I know that changes to laws are not easy to make quickly, making our state and country safer must be a priority. Our elected officials must act to make lasting and effective laws that will help to avoid a similar event from happening again. There has to be a better solution for this great state and country. Please make changes!

Respectfully yours,

Nicole Morris
