

I'm writing to tell you that I **strongly support better gun control laws** that include ALL potential gun purchasers needing to have a **background check** done on them before purchase of a gun. Additionally, we **need to ban assault/automatic/semi-automatics, and banning high-caliber magazines.**

While there are other issues that contribute to the violence we saw at Sandy Hook, the accessibility to firearms is at least part of the whole program we need to implement to decrease violence and increase the possibility for greater safety within our country.

Thank you for considering my opinion.
