

To: Connecticut Bipartisan Task Force On Gun Violence Prevention

We are writing you today to encourage you to adopt the draft of legislation submitted by CT Against Gun Violence.

This comprehensive package of gun violence prevention measures will go a long way to keeping our children and communities safe and perhaps, be a model for the nation.

People like us around this State are counting on Connecticut lawmakers to rid our state of dreadful assault weapons and the high-capacity magazines and warfare ammunitions that feed these guns. We have reached the end of our rope in terms of tolerating less-timid legislation on this issue. The time is now to think only of the safety of the public and stop the pandering to the gun industry and their influence peddlers.

The Connecticut people need the strongest possible control laws of high powered, modified military weapons, and the high-capacity magazines and warfare ammunitions that feed these guns, period. We support and expect no less.

Respectfully,

Peter B. Wilson
