

I live in Newtown, CT

Please consider:

1. Gun Control as 2nd hand smoke - criminal and mental health checks must review not only the buyer, but others living in the home, now and in the future as household mental health changes...this is most likely the Newtown situation.
2. A limit or monitor of ammunition's sales. A large weekly purchase is a indication of concern.
3. Limit the rounds in a cartridge of semi-automatic weapons.
4. Limit or ban the sales of semi-automatic rifles and weapons.
5. If the NRA pushes for armed guards in schools...let us pay for it by taxation of guns and ammunition sales...not general taxpayers.
