

Statement Supporting Gun Control.

Lines need to be drawn between legal and illegal. Hand grenades and machine guns are illegal. The proper use of guns is for sporting, hunting, and self defense. It is my understanding that a shotgun is one of the best weapons for self defense.

To ban assault weapons and large capacity clips (over 10) does not impact sporting, hunting and self defense. I can see how this stuff is fun. Heck, I'd love to drive a tank and shoot its gun too. But we have to draw lines.

It is a shame that this needs to be done. Looking at history, the rapid fire and large capacity of the guns is what kills so many so quickly.

I hope in addition that once these legal weaponry is curtailed, then an examination of laws pertaining to use of weapons in commissions of crimes, and the selling of weapons without any checks is examined.
