

Dear Sir or Madam,

I cannot for one moment, one second, understand how an intelligent, thinking citizen could believe that assault weapons should be in the hands of anyone except the military. What kind of argument is there? That is not a second amendment right as we know weapons in the 1700s looked very different. We're not talking about all guns. Is it all about money?

I will do what I have to help to make change. Yes, we need to do something about mental health and our culture of violence, but let's not give troubled folks this kind of ammunition for their frustrations.

We all know it's not right.

Respectfully,

Roseann Spengler
