

Please do not let an emergency certification go through on ANY gun related bill. The people deserve the chance to voice their concerns on all aspects of these bills.

Do not impose restriction on the good people of Connecticut that will not have any effect on the reduction of crime. Targeting certain firearms and magazine capacity will only hurt the law abiding and empower the criminal element

Gun control does not equal crime control. "Assault weapons" legislation that limits the type of firearm allowed or arbitrary magazine limitations to the citizens has been proven to have no effect on crime rate. The previous 1994 assault weapon ban and the subsequent sun-setting showed that violent crime has had a steady decline. The enacting of concealed carry laws around the country has actually had a positive impact on violent crime.

I do not support any additional bans of weapons or magazines.

I do not support any taxes on firearms or ammunition.

I do not support registration of firearms or increased registration fees or renewal time.

I do not support the publishing of permit holders names and addresses.

I do support reopening the Fairfield Mental Hospital.

I do support reopening the Norwich Mental Hospital.

I do support increased funding to the mental health industry.

I do support funding for resource officers in every school.

Please consider the data that supports the fact that gun control laws DO NOT control crime.

I will be looking at your voting records on the various bills being proposed. I will be voting you out of office if you are responsible for passing ineffective legislation.

Sincerely,

Ryan Dubey
