

To whom it may concern,

Please accept this as public testimony in connection with the Gun Violence Prevention Task Force.

I strongly oppose any new gun control legislation in Connecticut.

As a law abiding gun owner I am tired of being blamed for crimes that neither myself nor my firearms caused. Government cannot cure the evils of society through legislation, and to believe otherwise is absolute hubris on the part of legislators. Any attempt to make Connecticut a better place by destroying the civil rights of law abiding citizens is misguided and must be vehemently opposed.
