Both my husband and I are very much in favor and insist on much stricter gun laws:

1. No assault weapons of any kind
2. Stronger restrictions on the sale of ammunition
3. State & National valid background checks on all gun and ammunition sales including the 40% sold on the internet which have no restrictions what so ever.
4. An end of all loop holes which prevent passage of the above.

We have grandchildren the same age as the murdered children of Sandy Hook. We are deeply worried about their safety in school and out of school and about the safety of all law abiding citizens.

Both of us own sport guns safely locked away in a safe. None of these guns uses more than 2 cartridges. The murders by guns in the United States are catastrophic, uncivilized, and intolerable. It is urgent all of us put pressure on politicians and governments to change this outrage.

No more caving in to the NRA. Their hiding behind the Second Amendment is illegal and a misinterpretation.

Both my husband and I will support any effort in this direction.

Sincerely,

Sigrid Kendall
