

Robert Gibbons received his doctorate in statistics and psychometrics from the University of Chicago in 1981. He spent the first 30 years of his career at the University of Illinois at Chicago (1981-2010) where he directed the Center for Health Statistics, a consortium of 15 statisticians working in both theoretical and applied areas of environmetrics, chemometrics, biometrics, and psychometrics. Support for his research includes numerous grants and contracts from the NIH, NIMH, ONR, NCI, and MacArthur foundation. Recognition for his work includes a Young Scientist Award from the Office of Naval Research, Research Scientist Award from NIH, the Harvard Award for lifetime contributions to psychiatric epidemiology and biostatistics, the Lucaks award for contributions to environmental statistics in the 20th century, two Youden prizes (2001 and 2006) from the American Statistical Associations for statistical contributions to the field of chemistry. Professor Gibbons is a Fellow of the American Statistical Association and an elected member of the Institute of Medicine of the National Academy of Sciences. He has authored more than 200 peer-reviewed scientific papers and five books. Professor Gibbons received the 2009 Outstanding Statistical Application Award from the American Statistical Association for contributions to drug safety and the 2009 Distinguished Faculty Award from the University of Illinois at Chicago. In 2010 Professor Gibbons joined the faculty of the University of Chicago where he is Professor of Health Studies, Medicine, and Psychiatry, and continues to direct the newly established Center for Health Statistics at the University of Chicago. Professor Gibbons is a 2011 University of Chicago Pritzker Scholar, and the 2012 recipient of the RemaLapouse Award for contributions to Psychiatric Epidemiology from the American Public Health Association.
