We should make it harder for dangerous people to obtain deadly weapons. We should do a much better job enforcing the many laws already on the books. We should protect our schools with trained armed security guards. We should computerize the mental health records and include them in our NICS database. We should require transfer of firearms forms to be done for every future transfer and anyone should be able call a NICS line to receive an approval status for a transfer. All firearms owned legally should be exempt from federal registration. The State Police already have the necessary records. Let me say this - I do vote and my vote will only go to someone who supports the 2nd amendment and is willing to appose this 2013 assault weapons ban which only punishes law abiding people and fails to focus on solutions that will help make us safer.

Thank you
