

TWIMC: Please ban assault rifles, all multiple round clips and hand guns. None of these are used for hunting. Do not let a paranoid few prevent the majority of citizens from living in a safer society.

Please work to increase the ability of law enforcement to approve, track and control the sale of weapons and ammunition. Please create laws that make it illegal to bring weapons and ammunition illegal in to our state from other states. Please work to create national laws that prevent the sale of the weapons identified above. Please create laws whereby local law enforcement verifies the proper storage of weapons such that if they are stolen or misappropriated they can not be used: trigger mechanisms are locked and/or the weapons are disassembled and the individual parts are stored separately.

Civilians have no need for body armor. Please make the sale of body armor to anyone other than law enforcement, illegal.

It is reasonable, right and for the good of the people to restrict the kinds of weapons and ammunition available to this country's citizenry. Sporting firearms, for hunting and target shooting, are the only reasonable weapons that should be available for our citizens.

The fewer guns there are, the less overall gun violence will occur. Please do not allow anecdotal stories, whose promotion is paid for by gun business interests, to prevail in this discussion. Listen to the general opinion of the people and prevent the availability of weapons and ammunition that aren't for use in hunting.

If a strict interpretation of the US constitution were to be broadly required, without consideration of the reasoned intentions of the authors and the definitions in their time, then only single fire, individually wrought weapons should be allowed.
