

To Whom it may concern:

As a resident of Newtown I feel compelled to voice my concern about the lack of sensible gun control laws. While we have among the strictest controls in the country it is not enough by far to make our world safer for our children as well as all of our citizens. It seems obvious to me that more guns means more gun violence whether purposeful or accidental. Stop the proliferation of guns and strengthen the requirements for safe handling of guns and ammunition. I urge you to work for and to pass laws including those that require permits and universal background checks on all sales and transfers of all guns, ban high capacity magazines, strengthen assault weapon bans, require annual background checks, require safety inspections, make gun owners liable for harm caused by their weapons if storage was negligent, ban on right of way for transportation fo firearms and ammunition bought over the internet, and restricting handgun sales to one per month.

Thank you, Susan Tarshis,
