

To whom this may concern I am writing to let my politicians know the disappointment I now see in them, the laws they are passing are ridiculous. Will the criminals really register their guns and pay taxes? So who are you punishing here the criminals or the people who obey the laws? Lets begin by enforcing the laws you have for background checks and not giving guns to people who have a psychiatric history or a history of violence.Its about time you stop passing laws with no backbone and start enforcing the existing laws instead of just adding new laws to complicate the system and mess up the economy.Its time to get out of your chairs and actually look at what is happening because you are just penalizing the honest people and totally missing the bad ones with these laws.Its time to respect those of us who are honest gun owners for the beauty of hunting and gun ownership and stop penalizing us. Thank you for your time Theresa elliot
