

Sirs / Madames,

Persons with handgun or rifle experience will tell you that dropping a clip, installing a new one, and re-racking is an **exercise that take a matter of 10 seconds or less** in most cases. By limiting magazine sizes to 10, you would simply be losing a madman portion of that amount of time. You are **solving for the wrong issue** here.

As a handgun owner, may I suggest you **focus the legislation** on tightening the **issuance of carry permits** and on **gun locking and storage laws** such that they are can not be accessed (legally) so easily. Proper storage of firearms and ammunition might have prevented the tragedy in Newtown.

Respectfully,

Tim Davis
