

Good afternoon,

My name is Todd Mitchell and I am a father of a 18 month old boy, husband, and lifetime resident of the State of Connecticut. I write to you in hopes that the committee will not act in an irrational manner while addressing legislation that potentially can have drastic effects on legal citizens 2nd amendment rights. Many unknown facts are still to come from the State Police report on the event at Sandy Hook that should have and impact on trying to keep it from happening again. I am a believer that the Constitution should be honored and if times dictate change , that we follow the proper procedure to amend it. I do not believe that the power of one party should be used to legislate its will on the people.

Currently I believe the Democratic lead state of Connecticut legislator will use emergency legislation to justify the violation of my rights. I have and will follow all laws, but will drastically increase my time and money spent to see that any legislator that votes for such legislation is removed in the next election. Further I will spend my money to help contest in court any laws that violate my rights.

Gun control does not stop violence. Simply look at those area's with the strictest gun laws. Gun control advocates have noble intentions but common sense laws need to be made by rationally thinking people. Do NOT infringe on my rights to protect my family.

Regards,

Todd Mitchell
