

To Whom it May Concern:

At the core of each and everyone of us is our innate need to feel safe, valued and secure. There is not a single person in our country who feels safe a secure sending their child to school, or going to a movie or even shopping at a mall. Because of the frequency and severity of gun massacres and assaults around us everyday. Nobody is safe, anywhere.

As a citizen of our beloved country and a believer in our constitutional right to "life, liberty and the pursuit of happiness", I believe our irresponsible guns laws are taking away our constitutional rights of life, of liberty and pursuit of happiness.

Our 2nd amendment is impinging on our basic rights as humans.

The long term effect of gun violence, trauma and fear leaves lasting scars and imprints onto our genetic expression. Trauma can be felt, genetically three generations in the future.

For this reason, we need to protect ourselves, our children and future generations by restricting guns, by banning assault rifles and high capacity magazines.

Sincerely,

Trevor Crow, LMFT
