

Please support comprehensive gun control measures. I believe that a series of actions are needed to reduce the amount of gun violence in Connecticut and the nation. No one action will solve the whole problem but a series of actions should at least reduce it. Gun proponents would have us believe that no action will have any impact; this I cannot believe.

At minimum, please support further restrictions on the possession of assault weapons and magazine clip size. Please support the mandatory reporting of mental patients deemed by a medical professional to be a danger to others to the FBI's background check database. Please also support mandatory background checks for *all* gun sales.

Thank you for your service.
